

Greetings!

If you are considering to have a website in the German Language, Woo Hoo Designs is capable of producing a site that is uniquely designed for your marketing needs. In May 2009, I Karen, owner of Woo Hoo Designs built a site for the German Author, Helga Zeiner. She was very pleased with the end result. Here is Helga's comments;

"Dear Karen, now that the job is done, I want to thank you so much for your work on my authors website. Your input on the creative level has improved the initial concept way above what I was hoping for. You definitely have a good sense of transforming complex issues into an easily understood format, and this is a great asset for the work you are doing. I also appreciated your patience when explaining the technical side of setting up a website, which is something many of us obviously don't understand.

*Being an author, whose books cater mainly to women, I welcomed the chance to work with a woman who showed such knowledge and professionalism - proving once again that we can do it!
All the best, Helga Zeiner"*

In order to build a website, we do not have to meet in person, I have created several sites by communicating only with email. Sometimes a telephone call may be required to further explain things.

If you tour Woo Hoo Designs website and have any questions, perhaps you need translation of what is written on my site. I would be more than pleased to answer your questions or have what is on my site translated for you. Just contact me by using the "Contact page" on my website.

Sincerely, Karen Passmore, owner/designer of Woo Hoo Designs.
